ENCROACHMENT PERMIT INSPECTIONS

INSPECTION TYPES

- Preconstruction Inspection
 - A preconstruction meeting is required prior to the start of any work. The Applicant and Contractor are required to attend.
- Subgrade Inspection
 - A subgrade inspection is required prior to the placement of concrete. Rebar, wire mesh, and dowels (if required) may be installed prior to subgrade approval.
- Concrete Installation Inspection
 - No work shall be accepted without a final inspection by the Copper Valley CSD
- Final Inspection
- Other
 - Other specific inspections may be required for your project. Contact our office for details.
